

LAZER TRACKER

LAZER TRACKER FORK-TIP GUIDENCE SYSTEM

The single most effective material handling tool that addresses issues of controlling product damage, increasing productivity, and creating a safer work environment. The patented fork-tip laser guidance system will assist the forklift operator with pinpoint accurate fork-tip placement.

DECREASE MATERIAL DAMAGE

INCREASE PRODUCTIVITY

IMPROVE WAREHOUSE SAFETY

BENEFITS

- ➔ **Decrease Material Damage:** Never puncture product from improper fork-tip placement
- ➔ **Increase Productivity:** The laser beam enables faster and more accurate vertical/horizontal alignment, increasing daily picks.
- ➔ **Improve Warehouse Safety:** Eliminate the search for pallet entry on high lifts and reduce the possibility of pushing the pallet over.
- ➔ **Improve Operator Ergonomics:** Greatly reduce the need for craning outside the forklift to align with a pallet.
